

STEREO MOC Status Report
Time Period: 2008:098 - 2008:104

STEREO Ahead (STA) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. Ahead spacecraft performance continues to be very good with all subsystems performing nominally. The following spacecraft/instrument events occurred during this week:

- On day 100, a SECCHI flight software load version 5.08 was successfully conducted.
- On day 104, during the DSS 34 support, PLASTIC telemetry rate, current, and high voltage were low. PLASTIC instrument team is investigating.
- The average daily SSR playback volume for Ahead was 7.0 Gbits during this week.

STEREO Behind (STB) Status:

1. The following Ground System anomalies occurred during this reporting period:

- None.

2. Behind spacecraft performance continues to be very good with all subsystems performing nominally. The following spacecraft/instrument events occurred during this week:

- On day 098, an IMPACT LET flight software patch was successfully loaded.
- On day 100, a SECCHI flight software load version 5.08 was successfully conducted.
- The average daily SSR playback volume for Behind was 7.0 Gbits during this week.
